WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make two. Cut 100 x 100 mm from 6 mm aluminium plate; deburr.
Mark a centre cross. Measure sideways from the vertical centre line and up or down from the horizontal one.
Mast U-bolt holes: four 9 mm holes, 24 mm each side of centre, 30 mm above and 30 mm below centre.
Standoff U-bolt holes: four 9 mm holes, 35 mm each side of centre, 20.9 mm above and 20.9 mm below centre.
Check the U-bolts you bought: their leg spacing sets these holes (M8 U-bolts for 40 mm tube and for 33.7 mm pipe).
Fit: the plate stands upright between the mast and the standoff; the mast touches one face, the standoff the other. Two U-bolts wrap the mast, two wrap the standoff, nyloc nuts on the far face.
Check: all eight holes line up with the U-bolt legs by hand.
