WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut a 170 x 150 mm blank: the 150 x 130 mm top with a 10 mm flange on each edge. Drill a 3 mm relief hole at each corner.

Fold all four flanges 90 degrees down (drip edges).

Drill four 4.4 mm holes for the spacers: 35 mm each side and 28 mm in front and behind a point 15 mm east of the top's middle (the hood hangs 40 mm further over the west end, the lens end).

Fit: four 15 mm M4 aluminium spacers screw into the lid; the hood sits on them and four M4 screws hold it. The 15 mm air gap keeps sun and radiant heat off the box.

Check: the flanges stand 5 mm or more clear of the lid all round.
